The Hearst newspapers, catering somewhat to that portion of the Irish-American population which mistakenly assumes the league will obligate the United States to render active aid to Great Britain in the even of an Irish rebellion, are conducting a negative campaign against the league by emphasizing an America first doctrine that appeals to those who either are unaware of the terrible plight of Europe or who have not yet learned that a war over strictly European affairs can bring about an invasion of American rights and disturb the peace of the world.

Many people have not yet taken to heart the lessons of the late war and assume that the United States can return to a policy of isolation and neutrality in world affairs and wait again for a direct transgression of her rights before recognizing a common menace but the large body of the people here are not of that opinion. They have not analyzed the league of nations as lawyers would, but they have analyzed what war is and anybody who imagines the people have acquired any tremendous enthusiasm for military exploits as a result even of the spectacular achievements of our army in France is much mistaken.
